SUMMER 2026

trends

SUMMER 2026

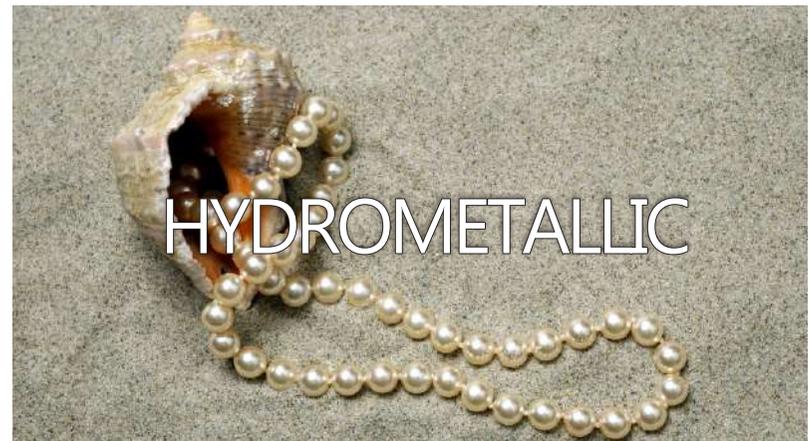

A essência ardente do sol e a rica tapeçaria de cores e texturas das paisagens áridas. Os couros trabalhados buscam capturar o resplendor da luz solar através de tons terrosos, dourados e acentos de laranja e vermelho, onde cada peça é um testemunho da harmonia entre calor e beleza.

The burning essence of the sun and the rich tapestry of colors and textures of the arid landscapes. The crafted leathers seek to capture the radiance of sunlight through earthy, golden tones and shades of orange and red, where each piece is a testimony to the harmony between warmth and beauty.

Fusão entre a fluidez etérea da água, o brilho das pérolas e a solidez reluzente do metal. O tema traz movimento e brilho, enquanto detalhes metálicos e perolizados enriquecem as criações, caracterizadas por tons de azul, texturas metálicas, pérolas e toques de verde exuberante.

The fusion between the ethereal fluidity of water, the shine of pearls and the sparkling solidity of metal. The theme brings movement and shine, while metallic and pearled details enrich the creations, characterized by shades of blue, metallic textures, pearls, and touches of lush green.

A elegância do couro com texturas orgânicas, veios amadeirados e a beleza atemporal dos papiros em uma paleta de cores dominada pelos amarelos, tons terrosos e verdes azulados suaves. Evocando a serenidade dos bosques e madeira, nuances naturais dão um toque de aventura selvagem e rusticidade.

The elegance of leather with organic textures, woody veins, and the timeless beauty of papyrus in a color palette dominated by yellows, earthy tones, and soft bluish greens. Evoking the serenity of forests and wood, natural nuances give a touch of wild adventure and rusticity.

Entrelaçando a sofisticação dos répteis, a robustez dos mamíferos e a elegância das aves, designs exclusivos celebram a beleza única de cada criatura. Tons terrosos, verdes profundos e nuances de bronze, refletem essa riqueza em um convite para explorar a intrincada harmonia da vida animal através da moda.

Interweaving the sophistication of reptiles, the robustness of mammals and the elegance of birds, exclusive designs celebrate the unique beauty of each creature. Earthy tones, deep greens and bronze nuances reflect this richness in an invitation to explore the intricate harmony of animal life through fashion.

An aerial photograph of a colorful, eroded landscape, likely a badland or a similar geological formation. The terrain is characterized by deep, winding gullies and ridges, creating a complex, textured surface. The colors range from deep reds and oranges to yellows and greens, suggesting different soil compositions or mineral deposits. A road with several utility poles runs horizontally across the upper portion of the image. The overall scene is one of dramatic, natural erosion.

MOUNTAIN

Chrome Leather
Retanning: Glove Nappa - 1,0/1,1mm
Full Grain

Exceptionally transparent full-aniline finishing, with shiny wet-touch waxes, and a thin lacquered topcoat on a very soft, light, and smooth leather.

MOUNTAIN

A photograph of a desert landscape. The foreground is dominated by a vast expanse of cracked, dry earth, forming a mosaic of irregular, polygonal shapes. The ground is a mix of light tan and dark brown tones. In the middle ground, several dead, skeletal trees with dark, gnarled trunks and branches stand against the horizon. The background features rolling red sand dunes under a clear, pale sky. The overall color palette is warm, with strong reds, oranges, and browns.

GETTI®

PAPYRUS

Chrome Leather
Retanning: Granna Natural - 0,9/1,0mm
Corrected Grain

Rustic look article, with a high covering power opaque finishing, hand-aged effect, and velvet touch.

PAPYRUS

A detailed close-up photograph of weathered wood. The surface is heavily textured with deep grooves, cracks, and peeling bark. Patches of vibrant blue-green lichen are scattered across the wood, particularly in the upper right and lower right areas. In the lower center, there is a small, circular area where the wood has been eroded, revealing a bright green moss underneath. The overall color palette is a mix of natural wood browns, greys, and the striking colors of the lichen and moss.
